

super joints FIZZ™

- Easier to absorb than solid supplements
- More convenient to take than swallowing large solid capsules or tablets
- Provides nutrients for supporting joint health and decreasing inflammation
- Effervescent fizzing formula allows for easy mixing and a pleasant flavor

Why the "FIZZ" is better:

The simple truth is that liquid supplements absorb faster and more efficiently than solid supplements. When you need relief, do you really want to wait? Try **Super Joints FIZZ™** for maximum absorption and faster relief with scientifically proven ingredients that work. **Super Joints FIZZ™** was developed to be effective and convenient and to avoid the trouble of swallowing large tablets. With a formula that includes MSM, Glucosamine, Chondroitin and other highly bioavailable natural ingredients, **Super Joints FIZZ™** is the ideal solution to an effective joint health program. Just 2 servings per day of **Super Joints FIZZ™** will enhance mobility and provide optimum support for joints and connective tissue.

Suggested Use:

Suggested Use: One (1) scoop twice daily in eight (8) or more ounces of water or fruit juice. Less or more liquid may be used depending on individual taste preferences. Wait 60 seconds to allow ingredients to dissolve completely before consuming.

Did You Know?

Glucosamine is a building block for cartilage, directly addressing joint repair. It aids in proper lubrication of joints and in improving flexibility. Chondroitin is a necessary element in maintaining the gel-like nature and shock absorbing quality of cartilage. Chondroitin Sulfate is thought to help Glucosamine to be more effective. MSM is an important element to all cells and body tissues - especially joint tissue where it stabilizes connective tissue matrix of cartilage, tendons and ligaments. MSM can also arrest inflammation and help to reduce pain. Pantothenic Acid is thought to accelerate the healing in tissue repair. Vitamin B6 is used to reduce swelling pain, especially of finger joints, for improved joint range of motion and ease of movement. Antioxidants (Vitamin C, Selenium and Zinc) help reduce pro-inflammatory free radicals. Vitamin C is directly involved in building collagen and enhances connective tissue strength. Trace Mineral Blend: Manganese, Boron, Selenium, Zinc, and Copper provide necessary minerals needed in biochemical pathways involved in tissue repair, joint swelling, tenderness, stiffness and for collagen and elastin support.

Baywood also offers **Cal-Mag FIZZ™**

Why Cal-Mag FIZZ™?

Baywood's unique effervescent blend of **Cal-Mag FIZZ™** provides maximum absorption of all its ingredients. Our special blend of 4 different forms of ionized calcium in our exclusive effervescent formula is the most absorbable & bioavailable form of calcium available today. This means stronger bones and a much healthier lifestyle for both young and old alike.*

Suggested Use:

Suggested Use: One (1) scoop twice daily in eight (8) or more ounces of water or fruit juice. Less or more liquid may be used depending on individual taste preferences. Wait 60 seconds to allow ingredients to dissolve completely before consuming.

Did You Know?

Vitamin D benefits bones, teeth, and optimizes calcium metabolism. **Calcium** benefits bone and tooth development and maintenance, muscle contraction, nerve transmission and is also necessary for regulating heartbeat. **Magnesium** enhances enzyme activity, maintains healthy arteries, protein production & nerve function, works as a transport for calcium and aids in the absorption of calcium.*
